## SUMMARY

I'm a 24-year-old master's student in Informatics, currently in my final year with a focus on web development. I have a solid background in building modern, interactive web applications and a year of professional experience working with modern frameworks such as Vue.js, Angular, and Next.js. I've contributed to a variety of projects, adapting quickly to changing requirements and collaborating effectively within cross-functional teams.

## SKILLS

HTML, JavaScript, CSS, TailwindCSS, TypeScript, Vue.js, Angular, Next.js, React, jQuery, Prisma ORM, PostgreSQL, Git, Github, Bash, Docker(basic)

## WORK EXPERIENCE

**Kupuj Online d.o.o** Jul 2024 - Aug 2024  
Frontend Developer Intern *Fiorello la Guardia 13, 51000 Rijeka, Croatia*

- Developed a dashboard web application for managing users and payment orders using Angular and PrimeNG components; integrated with JSON Server for mock backend functionality and API simulation
- Translated Figma designs into responsive frontend pages for the Visit Rijeka Shop and Hacienda nightclub admin web shop, ensuring visual consistency
- Gained hands-on experience with SSSR (Signals, State, Selectors, Reducers) architecture in Angular, improving code organization and state management practices

**Juice d.o.o** Oct 2022 - Sep 2023  
Frontend Developer *Prolaz Marije Krucifikse Kozulić 1, 51000 Rijeka, Croatia*

- Maintained and enhanced existing web applications by adding new features and improving UI/UX across Vue.js, embedded JavaScript and Angular codebases
- Implemented functionality using jQuery in a Vue widget application, and later refactored legacy jQuery code to modern JavaScript, improving performance and maintainability
- Implemented a complete redesign of the Visitorapp web application, translating Figma mockups into responsive and accessible Angular components
- Attended daily morning Scrum meetings as part of an Agile development workflow

## PROJECTS

**Wavesphere d.o.o** Oct 2024 - Feb 2025  
Frontend Developer

- Developed responsive frontend features for the Eventwave web application using Next.js and Tailwind
- Translated complex Figma design into pixel-perfect, production-ready interfaces
- Customized Shadcn UI components to match design and improve consistency
- Collaborated with the backend developer to connect UI components with dynamic data

## EXTRACURRICULARS

### Ri-Hack 3.0

- Designed and developed the frontend for RukaZaRuku, a community platform for service exchange using in-app tokens
- Had Frontend and UI/UX efforts, translating ideas into user-friendly Angular components under tight 24-hour constraint
- Collaborated in a 4-member team and won 1st place for innovation, execution, and social impact

## EDUCATION

**Faculty of Informatics and Digital Technologies** Oct 2023 - Present  
Master's Degree

**Faculty of Informatics and Digital Technologies** Oct 2019 - Sep 2023  
Bachelor's Degree

**High School of Electrical Engineering and Computing** Sep 2015 - May 2019  
Computer Science Technician
